Building Material Testing

Building a safe and secure
with quality materials.

That's why our building material quality control testing services are designed to ensure the materials you use meet the highest of safety and performance.

We deliver an extensive
range of building material
testing services to our clients.

We analyze the quality of building materials testing on soils, rocks, aggregates, Admixture, Fly ash, Masonry, Tiles, Wood, Steel, In toda global markets and increasing emphasis on quality, need for laboratory tested data has increased many times and top of that accuracy and reliability of data is an another concern.

Road Material Testing

Welcome to our Quality Control Testing services for Road Materials.

Our goal is to ensure that roads built and maintained are safe, durable, and of the highest quality standards

Looking to ensure your road materials are of the best quality?

Look no further than our quality control testing services! We can ensure that your materials meet all the necessary requirements for a successful road project. Whether you're building a new road or repairing an old one, our quality control testing services are essential for a smooth and successful outcome.

Water Testing

Look no further! Our experts can help you analyze your water and take the

Trust the experts when it comes to water quality control testing services.

We have over 20 years of experience helping businesses monitor and maintain their water quality.

Good quality drinking water is still a distant dream for most of the population.

Hence assessing the water quality for human consumption and recreational purposes is of utmost importance.

it is catering to the needs of all concerned with water availability and water quality e.g.

Metal & Alloys Testing

We offer metal & alloys testing services

Our Metal & Alloys Testing services offer comprehensive testing and analysis of the physical and chemical properties of metals and alloys.

Testing Parameters We offer

At our testing facility, we ensure the highest standards of quality and accuracy in all our testing services.

Non-Destructive Testing

Professional Non-Destructive Testing Services (NDT)

Welcome to BTHPL Lab Non-destructive Testing (NDT) services! An important area of application of BTHPL Lab is non-destructive testing (NDT).

What advantages does non-destructive testing offer?

Testing equipment can pose a potential safety hazard if not properly handled.

This is especially true when it comes to testing corrosive or explosive atmospheres.

Soil & Geotechnical Testing

Soil & Geotechnical Testing Services

Soil testing is performed to determine the physical and chemical properties of soil. The main purpose of soil testing is to determine the suitability of soil for construction, agriculture, and other uses.

Agricultural Soil Testing

In agriculture, a soil test commonly refers to the analysis of a soil sample to determine nutrient content, composition, and other characteristics such as the acidity or pH level.

Microbiological Testing

**Microbial Quality Testing:
Reliable Results for
a Safer World**

Microbiological Quality Testing Services refer to the analysis and evaluation of microorganisms present in various substances and materials to ensure that they meet specific quality standards

Bacterial Testing:

Bacterial Testing: Testing for the presence of harmful bacteria in food, water, and other products to ensure that they are safe for consumption or use.

Environmental Testing

Environmental Testing
Services: Air, Water, Soil

Welcome to our Environmental Testing Service page, where we are committed to providing our clients with reliable and accurate data on various environmental parameters.

At our environmental testing
service page,

you can learn more about each of our testing services, including the parameters we cover and the methods we use.

Electrical Testing

Electrical Testing

Ensure the safety and reliability of your electrical devices with our comprehensive quality control testing services.

Electrical Testing (HT/LT)

Electrical testing is the process of evaluating the performance and safety of electrical equipment and systems.
